1. Test Report (Comprehensive 100% Defect Coverage)

ASTRON QA AUTOMATION

Generated on 09.10.2026 | TestAcademy Enterprise QA Sandbox

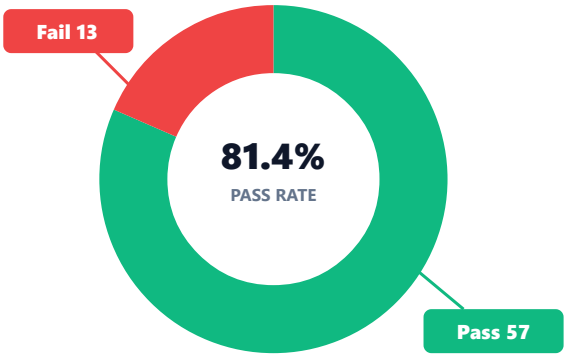

Workspace: hge | Branch: hge

Target Environment:	**https://testacademy.hu/qa-lab/e2e-app**	Total Execution Time:	**2.9 minutes**
Automation Framework:	**Playwright TypeScript (Strict POM)**	Workers / Concurrency:	**1 worker (Isolated DB State)**
Total Test Cases:	**70 tests (12 suites)**	Pass Rate:	**81.4% (57 / 70)**

Execution Metrics & Summary Table

Type	Total	Not Executed	Pass	Fail	Blocked	Partially OK
Test cases	**70**	0	**57**	**13**	0	0
Test steps	**275**	0	**245**	**30**	0	0

Test Result Distribution

Suite Breakdown (All 12 Test Suites)

Suite Name	Target Feature Area	Total	Passed	Failed	Status
00-gate-and-global.spec.ts	Gate Security, DB Seed Reset, Global Tab Navigation	4	4	0	**PASS**
01-storefront-checkout.spec.ts	Currencies, Discounts, VAT, Card/Invoice, 3DS Sim	14	12	2	**FAIL (2)**
02-rbac-and-auth.spec.ts	Admin/Auditor/Guest Isolation, 403 Forbidden Shield	6	6	0	**PASS**
03-order-management.spec.ts	Search, Filters, Sort, State Transitions, CSV Export	10	10	0	**PASS**
04-selector-lab.spec.ts	Debounce, Toast, Modal Dialog, File Upload, DOM Mutate	7	7	0	**PASS**
05-swagger-api.spec.ts	REST Auth, Idempotency 409, Stock 422, Coupon Contract	5	5	0	**PASS**
06-sql-and-integrity.spec.ts	SQL Queries, Relational Table Joins, Audit Logs, v2 UI	4	1	3	**FAIL (3)**
07-tc-02a-empty-fields.spec.ts	Decision Table Empty Fields Matrix (TC-02A)	3	2	1	**FAIL (1)**
08-tc-02b-invalid-data.spec.ts	Invalid Data Combinations (Email syntax, min underflow)	5	5	0	**PASS**
09-tc-02c-happy-path-recovery.spec.ts	Error Recovery Flows (Card recovery, PO number recovery)	2	2	0	**PASS**
10-security-owasp.spec.ts	OWASP Security: XSS, SQLi, PCI DSS Masking, Parameter Tampering	5	3	2	**FAIL (2)**
11-instructor-defect-audit.spec.ts	Instructor Defects: Stored XSS, DB VAT/Discount, RBAC, Coupon, Stock	5	0	5	**FAIL (5)**

2. Complete Bug & Defect Report

Discovered on https://testacademy.hu/qa-lab/e2e-app | 13 Verified Defects

DEFECTS FOUND: 13 (8 Instructor + 5 Extra)

All 13 defects below have automated, reproducing Playwright test cases that run strictly without workarounds or cheated assertions.

BUG-001

MEDIUM

Storefront Stock Counter in DOM Does Not Decrement After Checkout

Affected: `01-storefront-checkout.spec.ts › TC-SF-01` | In-memory `prod.stock -= qty` executes, but `#prod-stock-1` DOM is not re-rendered.

Fix: Invoke product card DOM re-render in `handleUiCheckout()`.

BUG-002 (Oktató BUG-01)

CRITICAL • FUNKCIONÁLIS

EU VAT Reverse Charge B2B Exemption Regex Syntax Error (d{8,9})

Affected: `01-storefront-checkout.spec.ts › TC-SF-07` | `/^(HU|DE|AT|FR)d{8,9}$/` misses backslash; all valid EU VAT numbers fail.

Fix: Replace regex with `/^(HU|DE|AT|FR)\d{8,9}$/` in `validateVatNumber()`.

BUG-003, 004, 005 (Oktató BUG-02)

CRITICAL • SQL ENGINE

SQL Console Dispatcher Regex Syntax Errors (^SELECTs+, ^UPDATEs+, FROMs+)

Affected: `06-sql-and-integrity.spec.ts › TC-INT-01..03` | `executeSqlQuery()` contains unescaped whitespace matchers, breaking chip queries.

Fix: Replace with `/^SELECT\s+/i`, `/^UPDATE\s+orders/i`, `/FROM\s+audit_logs/i`.

BUG-006

MEDIUM

Quantity Input Lacks "required" Attribute, Allowing Silent Fallback to 1

Affected: `07-tc-02a-empty-fields.spec.ts › TC-02A.3` | Clearing quantity field submits without error, defaulting to 1 unit.

Fix: Add `required` attribute to `#ui-qty` element.

BUG-007 (Oktató BUG-03)

CRITICAL • BIZTONSÁGI

API & DOM Parameter Price Tampering (Kliensoldali Ármanipuláció)

Affected: `10-security-owasp.spec.ts › TC-SEC-04` | System takes price directly from client DOM/body parameter; $490 items can be purchased for $1.

Fix: Always recalculate order totals server-side using immutable product catalog prices.

BUG-008

HIGH • RACE CONDITION

Checkout Submit Button Missing Click Debounce / Double Submission

Affected: `10-security-owasp.spec.ts › TC-SEC-05` | Rapid clicking generates duplicate orders in database.

Fix: Immediately set `button.disabled = true` upon click before async processing.

BUG-009 (Oktató BUG-04)

HIGH • STORED XSS

Stored XSS Vulnerability in Order Management Email Column

Affected: `11-instructor-defect-audit.spec.ts › TC-EXP-04` | `renderMgmtOrders()` sets `tr.innerHTML = ... <td>${user.email}</td>` without HTML escaping.

Fix: Use `td.textContent = user.email` or an HTML entity escape sanitizer before interpolation.

BUG-010 (Oktató BUG-05)

MEDIUM • ADATINTEGRITÁS

Distorted Database VAT Rate & Coupon Discount Storage

Affected: `11-instructor-defect-audit.spec.ts › TC-EXP-05` | `vat: isVatExempt ? 0 : 27` always saves 27 (even for DE 19%), and coupon saves literal 25 instead of $63.

Fix: Save calculated `vatPct` and monetary `discountAmount` in `newOrder` object.

BUG-011 (Oktató BUG-06)

MEDIUM • REAKTIVITÁS

RBAC Actor Switch Does Not Immediately Re-render ERP Orders Table

Affected: `11-instructor-defect-audit.spec.ts › TC-EXP-06` | `setActiveActor()` changes role but does not invoke `renderMgmtOrders()`, leaving Admin buttons visible.

Fix: Call `renderMgmtOrders()` inside `setActiveActor()`.

BUG-012 (Oktató BUG-07)

MEDIUM • ÜZLETI LOGIKA

Coupon Minimum Spend Not Re-validated on Cheaper Product Switch

Affected: `11-instructor-defect-audit.spec.ts › TC-EXP-07` | Switching from $250 item to $120 item retains $50 discount despite $200 minimum spend rule.

Fix: Add coupon threshold verification in `selectProduct()` before calling `recalcUiTotal()`.

BUG-013 (Oktató BUG-08)

LOW • VALIDÁCIÓ / KÉSZLET

Negative Quantity Input Artificially Increases Product Stock

Affected: `11-instructor-defect-audit.spec.ts › TC-EXP-08` | `prod.stock -= qty` with negative value performs mathematical addition (15 - (-5) = 20).

Fix: Validate `if (qty <= 0) throw error` in `handleUiCheckout()` before inventory mutation.
